

# APPLAUSE

## for Carousel's Price and Features

Headquartered in Oklahoma City, Enable Midstream Partners develops, manages and maintains oil and natural gas pipelines and infrastructure. With teams working across the United States on large-scale projects, Enable Midstream needed a way to unite and recognize all of their employees' hard work and dedication. MTM's Carousel® provided the perfect solution for them to celebrate service milestones and safe choices in a fun and public way!

With so much recognition happening throughout the company, Enable Midstream named their program **A Round of Applause!** The program ensures that Enable Midstream recognizes all the people who make their success possible.

### The Clear Winner

Before selecting a social recognition program, Enable Midstream carefully researched different options and providers. Their final decision came down to features and cost. Not only did MTM's Carousel platform provide customizable features and ample opportunities for future growth, but the custom-designed graphics perfectly matched Enable Midstream's brand.

### Memorable Moments

One of the favorite features of Enable Midstream's site is the Moments — a calendar which lists upcoming service anniversaries and birthdays. With just a click a congratulatory ecard can be sent, adding to the celebration.

### Real-time Newsfeed

Carousel's newsfeed allows Enable Midstream to share recognition with the whole company. Colleagues can then like, comment, or send an ecard—making that accomplishment all the more special! To date, employees have sent more than 5,400 badges and 2,900 ecards!

Ultimately *the cost was the bestselling feature that sold us* on the Carousel product.

*MTM's digital solution was significantly less than the competition and we evaluated two other providers.*

— Dee Dee Foltz, Enable Midstream's Recognition Coordinator

### Celebrating Safety

Keeping safety top-of-mind is a priority for Enable Midstream. Badges honor those individuals who make safe choices for defensive driving, first aid and accident- and injury-free performance.
